YASH PATEL

Frontend Developer (React.js Developer)

Navsari, Gujarat 396436 | 91-8320631943 | ympatel001@gmail.com | LinkedIn: YASH PATEL

PROFESSIONAL SUMMARY

Frontend Developer with practical experience building responsive, user-centric web applications using JavaScript and the MERN stack (MongoDB, Express.js, React.js, Node.js). Skilled in developing reusable React.js components, integrating REST APIs, and crafting responsive interfaces with Tailwind CSS and Bootstrap. Combines a MERN Stack internship at Wappzo Infotech with several full-stack projects, including e-commerce and admin-managed platforms. Looking to bring strong frontend fundamentals and full-stack exposure to an entry-level React.js / MERN Stack Developer role.

TECHNICAL SKILLS

Languages: JavaScript, Python, HTML

Frontend: React.js, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js

Database: MongoDB

EXPERIENCE

Frontend Developer (MERN Stack Intern) — Wappzo Infotech *Navsari, Gujarat | Jan 2026 – Apr 2026*

- Developed full-stack web application features using MongoDB, Express.js, React.js, and Node.js (MERN stack).
- Built and maintained core modules for a Car Sell and Rental Management System, contributing to its full-stack functionality.
- Designed and built RESTful APIs and integrated them with the React.js frontend to enable seamless data flow.
- Implemented responsive, reusable UI components in React.js to enhance interface consistency and user experience.

PROJECTS

Lanari Saree — E-Commerce Website

- Built a saree/product e-commerce website featuring a customer-facing storefront, backend functionality, and a dedicated admin panel.
- Developed a responsive product browsing experience with category and promotional sections to highlight collections.
- Created an admin-managed content system enabling non-technical updates to website images and product/category presentation.
- Focused on reusable UI components and a modern, user-friendly shopping experience across devices.

Car Sell and Rental Management System

- Developed a full-stack web application for buying, selling, and renting cars, covering both customer and admin workflows.
- Implemented JWT-based user authentication and authorization to secure application access.
- Designed a responsive UI with React.js and Tailwind CSS to deliver a consistent experience across devices.
- Built RESTful APIs with Node.js and Express.js, integrated with a MongoDB database for user, booking, and car data.
- Added car listing, booking, and admin dashboard features, and optimized API calls and state management to improve performance.

Cafe Management

- Built a console-based order management application using List data structures and control-flow logic.
- Calculated bills dynamically and tracked inventory to streamline the order-taking process.

Research Paper: Gesture-Based HCI & Pathfinding Optimization for Snake Game AI

- Researched real-time, gesture-controlled gameplay using computer-vision-based hand tracking for a Snake game.
- Compared pathfinding algorithms (BFS, Dijkstra, A*, IDA*, and Bellman-Ford) to evaluate and improve AI performance.

EDUCATION

Master of Computer Application **CGPI: 8.00**

Gujarat Technology University | Gujarat | Jan 2024 – Apr 2026

Bachelor of Science **CGPI: 6.50**

Veer Narmad South Gujarat University | Gujarat | Jan 2021 – Dec 2023
